

Health Science

Program

Swiss Hills' Health Sciences pathway is consistently one of our most popular because students consistently are some of the best prepared to launch into their next phase of training in the Central Ohio region. Students in this popular pathway prepare for careers veterinary science, pharmacy, nursing, athletic training or many other health fields.

- Prepare for careers such as physician assistant, therapy, nurse, dental hygienist, dietician, paramedic, surgical technician, and more.
- Students enrolled in Swiss Hills Schools who can commit two years to the program can attend this career-technical satellite located at the McVey Innovative Learning Center, part of the Innovation Generation Straight A Grant.
- Students actively participate in both HOSA-Future Health Professionals.

What can you do with a Health Science education

Bureau of Labor Statistics projects 29% job growth for medical assistants, 27% growth for phlebotomists, and 39% growth for EKG technicians through 2020.

Graduates of this program can attend Columbus State, The Ohio State University, Mt. Carmel School of Nursing, and can gain employment at hospitals, clinics, and physician offices.
