

Heavy Equipment Operations and Engineering

Program

Great buildings, parks, neighborhoods, roads and homes depend on a properly prepared site. The Swiss Hills Heavy Equipment Operations and Engineering program will teach you to use and maintain a wide range of equipment—and to understand why and how to create landscapes that will support great structures

College Opportunities

Operate earth-moving equipment under actual working conditions. Assemble, adjust, repair and maintain electrical, ignition, hydraulic, and cooling systems. Engage in minor engine repair, general maintenance, lubrication, and equipment safety. Conduct land surveys and read blueprints. Identify and measure the qualities of soils.
